

Henkel Products from Acculube

Acculube is a Leading Distributor of Henkel Metal Removal and Metal Forming Products, Neutral Cleaners and Corrosion Preventatives.

“We supply quality products that meet your goals for performance, cost and sustainability.”

AQUENCE®

LOCTITE®

Multan®

Synthetic

- **Multan 9103** – An oil rejecting synthetic metal removal fluid that has multiple uses in today's manufacturing environment. For use on ferrous alloys only.
- **Multan 3105** – an oil rejecting, synthetic fluid designed for machining, grinding and roll forming ferrous and non-ferrous alloys. It is also suitable for use on brass, copper and other exotic metals.

Semi-Synthetic

- **Multan B-163** – a low oil content, water soluble, semi-synthetic fluid designed for light duty machining and grinding ferrous alloys. It is designed for use in areas with soft to moderate water qualities.
- **Multan B-236** – a moderate oil content, water soluble, semi-synthetic fluid designed for machining and grinding ferrous and aluminum alloys. It is designed for use in areas where soft water or process requirements make foam difficult to control. Ideal for applications where RO or DI water is used.
- **Multan B-400** – a moderate oil content, bio-resistant, water soluble, semi-synthetic fluid can be used in most industrial removal applications and is suitable for use on brass, copper and other exotic metals. Typical applications are machining and grinding of ferrous and non-ferrous alloys.

Soluble Oil

- **Multan 2140** – This all-purpose, non-EP containing, bio-stable soluble oil is designed for machining and grinding ferrous and non-ferrous alloys. It is reinforced with esters to provide excellent lubricity for various types of moderate to heavy machining and grinding operations.

Straight Oil

- **Multan CR series** – These straight oils are designed for general machining applications such as hobbing, milling or shaping. They are used in operations ranging from steel gear machining to cutting tool manufacturing, and are available in 70, 100 or 200 SUS at 100F viscosities.
- **Multan CR 26** – This unique composition of corrosion inhibitors, Extreme Pressure (EP) additives, anti-mist agents and lubricity additives provides a durable straight oil for moderate broaching and machining operations.

Acculube's Sustainability Promise

Acculube, a national leader in the distribution of brand name lubricants and manufacturing fluids, is committed to policies and procedures that benefit its region, the environment, and its many valued customers throughout the Midwest – and beyond.

Acculube Tools and Tech Support Help Plants be More Efficient – and Profitable

Our comprehensive Custom Service Program (“ACSP”) is the ultimate added-value fluid management program

- Provides professional fluid management scaled to your facility and industry
- Allows your operation to continue “24/7” with zero shutdown!
- Maximizes equipment and tool life
- Lengthens service life of oils, coolants, solvents and other fluids
- Eliminates fluid “emergencies” and unscheduled fluids maintenance
- Immediately lowers chemical costs. Can also lower utility (water) bills, if you use large quantities of process water
- Immediately eliminates issues of handling, worker health and safety, maintenance training and regulatory documentation
- Immediately reduces disposal and environmental costs
- Is customized to your facility; no arbitrary minimums or restrictions

We support your purchasing department with pricing, inventory and other strategies to save costs– and time

Acculube supplies maintenance and operations with every fluid, and the broadest variety of chemical products – from quenchants to vibratory compounds, conversion coatings to absorbents, specialized coolants to straight oils.

We also provide consultation, and ongoing assistance regarding lubricant evaluation and interchangeability, analysis, equipment, reclamation and waste disposal, troubleshooting and more than a dozen other special concerns.

Your purchasing department will appreciate the way we’re organized to be your “one-stop shop,” where all the fluids you need, along with related products are available immediately, from a single source.
